CoinwayPAY

Supervisor sales

With the Supervisor Revenue API provides a dataset per supervisor that corresponds to a supervisor and contains the number of dealers, the discount, the number of transactions and information on the billed licenses in the period.

```
GET <server> / api / supervisor / turnover
```

Code Block 1 request

```
https: //api.coinwaypay.com/api/supervisor/turnover?from=2019-01- 01 & to = 2020-01-01 & $ top = 100 & $
skip = 0
```

Code Block 2 example

Query parameters

Surname	example	description
from	2019-07-01	Date query from
to	2019-08-01	Date query until
$ top	100	Submit 100 entries
$ skip	0	Skip entries

Header

Surname	example	description
X-Api-Key	00000000-0000-0000-0000-000000000000	Api Key for access to the API

Return value

```json
{ "total count" : 1234 ,

    "value" : [
        { "supervisorNumber" : "1234" ,

            "tenantCount" : 5 ,
            "sumDisagio" : 27.12 ,
            "transactionCount" : 5 ,
            "licenseSum" : 25.12 ,
            "licenses" : [
                { "licenseName" : "light" ,

                    "licenseCount" : 4th ,
                    "licenseSum" : 25.12
                },
                . . .
            ]},

        . . .
    ]}
```

Code Block 3 answer

Surname	example description	
supervisorNumber	1234 Supervisor number	
tenantCount	5	Number of dealers assigned to this maintainer.
sumDisagio	27.12 Amount of the discount of the transactions in this period have been settled.	
transactionCount	5	Number of transactions that were settled during this period
licenseSum	3rd	The sum of the license fees that were billed during this period
licenses		Information about the licenses (ATTENTION: This field will only be integrated in another version of the API or is empty)
licences.licenceName light		Name of the license
licences.licenceCount 4		Number of licenses
licences.licenceSum 25.12 Total licenses for this package in the period was settled.		

CoinwayPAY

tip

The API implements paging. If there are more than 100 entries, the request with the parameters $ top and $ skip must be executed several times in order to query all data.

Note

The data for the transactions are always provided with the settlement date. In the case of license fees, the transaction is only visible in the API with the payment date. This can result in delays between the actual transaction from the merchant and display in the API.

Customer support

The advisor customer API returns all customers for one advisor or several advisor.

```
GET <server> / api / supervisor / accounts
```

Code Block 4 request

```
https: //api.coinwaypay.com/api/supervisor/accounts?supervisor_number=12.12
3,241.12 & $ top = 100 & $ skip = 0
```

Code Block 5 example

Query parameters

Surname	example	description
supervisor_number	12,123,241,12	The supervisor number or multiple numbers, with Comma separated (supervisor number must be a valid int)
$ top	100	Submit 100 entries
$ skip	0	Skip entries

Header

Surname	example	description
X-Api-Key	00000000-0000-0000-0000-000000000000	Api Key for access to the API

CoinwayPAY

Return value

```
{ "total count" : 1234 ,

    "value" : [
        { "id" : 1234 ,

            "Surname" : "Muster GmbH" ,
            "phone" : "+43 1234 56789" ,
            "state" : "active" ,
            "createdAt" : "2020-01-01" ,
            "activatedAt" : "2020-02-01" ,
            "canceledAt" : zero ,
            "settlements" : [
                { "date:" "2020-04-01" ,

                    "licenseSum" : 19.99 ,
